The Merrimack Valley Planning Commission with support from the Massachusetts Office of Technical Assistance is organizing a training program to aid communities in emergency preparedness and best management practices in incident response and promoting reduction and safe use of hazard materials

The first training workshop, scheduled for Oct. 18th, 2017, is geared specifically for municipal facility managers, emergency response personnel and transportation officials. Topic area include:

- Regulatory Review and Resources
- Preventing Chemical Releases in Your Community
- How to Access Data on Toxic Usage in the Merrimack Valley
 - Climate Resiliency Planning
- Effective Ways to Engage Businesses on Safety
