10 YEAR HISTORY OF TRAFFIC COUNTS 2009 - 2018	115
MVPC STAFF	126

Traffic Volume Report Introduction

The Merrimack Valley Planning Commission (MVPC) presents the *2018 Traffic Volume Data Report* for each of the 15 communities in the Merrimack Valley region. This report contains a variety of traffic data charts, maps and copies of the 48-hour traffic volume counts taken by MVPC last year and represents the most comprehensive listing of traffic volume information available in our region.

The traffic counting program at MVPC serves numerous functions. Volume data collected by MVPC is used by Federal Highway Administration as part of their formula to allocate highway funding to the states. Private sector firms use this information to assist in making business location decisions. MVPC relies on these counts to help maintain its regional traffic model (the program used to project traffic demand in the region), and to determine if the region is meeting the requirements of the Clean Air Act. Local officials often use this data to gauge the effects of traffic on local roads and neighborhoods. And finally, state officials use the volume data collected by MVPC to assist them in the development and implementation of the management systems.

The traffic volumes in this report are presented by Average Daily Traffic (**ADT**). The ADT totals are from traffic counts taken for a consecutive 48-hour period and averaged out over the two-day time frame; however, because of uncontrollable factors (i.e. mechanical failure, weather, etc.), the ADT may also be taken from a 24-hour count period. The ADT are measures of the traffic volume in either one or both directions. All such details are indicated in each volume report. Please note that MVPC traffic counts are unadjusted volume totals for average weekday traffic and are not seasonally adjusted.

In 2018, MVPC successfully collected traffic volume data from 83 locations throughout the 15-community region. Along with the individual traffic count information, this report contains a 10 year history of all traffic counts conducted throughout the Valley.

The collection and tabulation of traffic data, as well as the writing and publication of this report, was carried out by Daniel A. Ovalle, Field Services Specialist, under the direction of Anthony Komornick, Transportation Program Manager.
